

TILT PERFORMANCE WORKSHEET

ASPIRATION: VISION/MISSION/DIRECTION

The vision of the South Milwaukee School District is to create a dynamic environment where the world becomes the classroom so the classroom impacts the world.

Rationale: Since this team is devoted to increasing the access and use of technology, we decided to use the district's existing vision statement. It captures our ultimate vision in making our classrooms more global places of learning.

Our mission is to provide our learning community with the information management tools and skills to fully integrate technology into the learning experience.

Rationale: In order to achieve our vision, this team will learn to use technology more effectively in the classroom. This means selecting and incorporating appropriate technology.

OBJECTIVES

Objective #1	Objective #2	Objective #3	Objective #4
To: Reach outside the classroom	To: Become comfortable with technology—transfer to students	To: Model Best practice for 21 st Century Classrooms	To: Influence district policy regarding new technologies
Critical Actions	Critical Actions	Critical Actions	Critical Actions
1. Lead district/school-wide in-services to train teachers in new technologies	1. Learn how to use new tools for global communication (e.g. Skype, Nings, Wikis)	1. Use Smart Response to Assess Formally/Informally in the classroom	1. Research policies of other districts
2. Attend conferences/school visits to learn more about new educational technologies	2. Integrate tools into the classroom to motivate students and enhance learning	2. Use Web 2.0 tech tools in our classrooms	2. Review new district policies related to technology and recommend changes
3. Collaborate with other districts on grants	3. Have students create and demonstrate uses of technology	3. Demonstrate use of new technology to teachers	3. Present recommendations to the school board
